

## Rebecca Pinals

Assistant Professor of Chemical Engineering

### Bio

---

#### BIO

The brain is a fascinatingly complex and delicate system of biomolecules, cells, and dynamic interactions that must be carefully maintained to support human health. When this balance is disrupted, disease can arise. Neurodegenerative dementias including Alzheimer's disease are highly prevalent and profoundly devastating, yet remain largely untreatable or incurable.

The Pinals Lab engineers neuro-models and nano-tools to uncover mechanisms of neurodegenerative disease and intervene to halt—and even reverse—disease progression. A particular emphasis of our work is on the blood–brain barrier (BBB), the vascular interface that serves as the molecular gateway into the brain. We leverage human induced pluripotent stem cells (iPSCs) to build 3D cellular systems, providing a platform to recapitulate human brain properties and pathologies. In parallel, we design nanoparticles to report on real-time neurochemical processes, enabling unprecedented access to dynamic and spatially resolved biomolecular phenomena, and to modulate disease states. By integrating advanced human brain tissue models with rationally designed nanotechnologies, we aim to generate fundamental insights and tools that translate into meaningful impacts for human health.

#### ACADEMIC APPOINTMENTS

- Assistant Professor, Chemical Engineering
- Member, Bio-X
- Institute Scholar, Sarafan ChEM-H

#### HONORS AND AWARDS

- Terman Faculty Fellow, Stanford University (2025-2028)
- MAC3 Impact Philanthropies Faculty Fellow, Stanford University (2025-2027)
- Knight Initiative Faculty Fellow, Stanford University (2025)
- Scialog Fellow: Neurobiology and Changing Ecosystems, Research Corporation for Science Advancement (2025)
- Career Award at the Scientific Interface, Burroughs Wellcome Fund (2023)
- Victor K. LaMer Award, ACS Division of Colloid and Surface Chemistry (2022)
- 1st place Langmuir Student Presentation Award, ACS Division of Colloid and Surface Chemistry (2021)
- Schmidt Science Fellowship, The Rhodes Trust (2021)
- 1st place Bionanotechnology Graduate Student Award, AIChE (2020)
- CAS Future Leader, American Chemical Society (2020)
- Chemical Engineering Rising Star, Massachusetts Institute of Technology (2020)

- Distinguished Young Scholars Seminar Speaker, University of Washington (2020)
- Women Chemists Committee / Merck Research Award, American Chemical Society (2020)
- ACTIVE Future Faculty Fellowship, University of Colorado Boulder (2019)
- Excellence in Teaching Award, University of California, Berkeley (2019)
- NSF Graduate Research Fellowship, National Science Foundation (2018)
- Outstanding Graduate Student Instructor Award, University of California, Berkeley (2017)

## PROFESSIONAL EDUCATION

- Postdoctoral Fellow, Massachusetts Institute of Technology , Neuroscience (2025)
- PhD, University of California, Berkeley , Chemical and Biomolecular Engineering (2021)
- BS, Brown University , Chemical and Biochemical Engineering (2016)

## LINKS

- Pinals Lab Site: <https://www.pinalslab.com/>

## Teaching

---

### COURSES

#### 2025-26

- Colloquium: CHEMENG 699 (Aut, Spr)
- Energy and Mass Transport: CHEMENG 120B (Spr)
- Undergraduate Honors Seminar: CHEMENG 191H (Aut, Win, Spr)

### STANFORD ADVISEES

#### Doctoral Dissertation Reader (AC)

Duo Sun

#### Postdoctoral Faculty Sponsor

Djuna von Maydell

#### Doctoral Dissertation Advisor (AC)

Yunbeen Bae, Daniel Perez Torres

#### Orals Evaluator

Theo Yang

#### Doctoral Dissertation Co-Advisor (AC)

Dylan Reil

#### Doctoral (Program)

Amanda Cai
