Stanford

Edward Guzman

Postdoctoral Scholar, Cardiovascular Medicine

Bio

BIO

Edward Guzman is a postdoctoral fellow in cardiovascular medicine at Stanford University. He earned his Ph.D. from Harvard University in collaboration with the Massachusetts Institute of Technology (MIT), focusing on RNA treatments for vascular diseases. His research has advanced the development of novel cardiovascular therapies and deepened our understanding of endothelial cell biology under diseased conditions.

PROFESSIONAL EDUCATION

- PhD, Harvard University & Massachusetts Institute of Technology (MIT)

STANFORD ADVISORS

- Euan Ashley, Postdoctoral Faculty Sponsor
