Stanford

Daniel J. Politzer

Ph.D. Student in Management Science and Engineering, admitted Autumn 2026

Bio

BIO

Daniel J. Politzer is a PhD student in Management Science and Engineering at Stanford University where he researches the impact of AI on organizations and the future of work. He does this as a member of the AI and Organizations Lab and the Center for Work, Technology, and Organization.

Prior to returning to school, Daniel held various positions including leading customer success teams at a technology company, serving as interim COO for turnaround projects, and managing portfolios and derivative trading books at hedge funds and banks.

Daniel has an MBA from the MIT Sloan School of Management and an AB in Social Studies from Harvard College.
