

Khang Tran, DO MBA

- Postdoctoral Medical Fellow, Gastroenterology, Hepatology, and Nutrition
- Fellow in Pediatrics - Gastroenterology

Bio

BIO

Kansas City University of Medicine and Biosciences -- Doctor of Osteopathic Medicine and Master of Business Administration (2019)

Good Samaritan University Hospital Medical Center -- Pediatric Residency (2019 - 2022)

UCLA Mattel Children's Hospital -- Pediatric Gastroenterology Fellowship (2022 - 2025)

Dr. Tran is passionate about advancing care for children with complex inflammatory bowel disease. Clinically, he aims to deepen his expertise in immunology, gain hands-on experience with emerging therapies and diagnostics, and develop the leadership skills necessary to coordinate multidisciplinary IBD care

His research focuses on global medicine and health equity, particularly in expanding access to high-quality IBD care worldwide. He also has a strong interest in the discovery and validation of biomarkers and predictive models for treatment response to advanced therapies, with the ultimate goal of personalizing care for children with IBD.

Dr. Tran is very excited to contribute to Stanford's innovative IBD program and to collaborate with clinicians and scientists who are shaping the future of pediatric IBD care.
