Affiliate, Geophysics

Bio

BIO

I am a Master of Science candidate in Computational Science and Engineering at the Harvard John A. Paulson School of Engineering and Applied Sciences and a Bachelor of Engineering graduate from Institut Polytechnique de Paris – ENSTA Paris.

I am interested in real-world applications of machine learning and AI, particularly for understanding complex physical systems.

At Stanford's Department of Geophysics, I worked under the supervision of Prof. Greg Beroza and Ian McBrearty on graph neural networks for earthquake phase association.
