

Jae Keun Cho

Visiting Associate Professor, Otolaryngology (Head and Neck Surgery)

Bio

BIO

Jae Keun Cho, MD, PhD, is a Visiting Associate Professor in the Department of Otolaryngology–Head and Neck Surgery at Stanford University School of Medicine and an Associate Professor at Inje University Ilsan Paik Hospital in South Korea. He is a head and neck surgeon whose clinical and research interests focus on head and neck oncology, tumor immunology, and translational research.

His research explores the tumor immune microenvironment and clinically relevant strategies to improve the diagnosis and treatment of head and neck diseases. His current interests also include the application of artificial intelligence to endoscopic imaging and surgical visualization, with an emphasis on translating emerging technologies into practical tools for clinical care.
