Publications

PUBLICATIONS

- **Inward transport of organelles drives outward migration of the spindle during C. elegans meiosis.** *Cell reports*
  Aquino, A. P., Li, W., Lele, A., Lazureanu, D., Hampton, M. F., Do, R. M., Lafrades, M. C., Barajas, M. G., Batres, A. A., McNally, F. J.
  2025; 44 (4): 115458

- **Redundant microtubule crosslinkers prevent meiotic spindle bending to ensure diploid offspring in C. elegans** *PLOS GENETICS*
  Li, W., Crellin, H. A., Cheerambathur, D., Mcnally, F. J.
  2023; 19 (12): e1011090

- **Conserved roles for the dynein intermediate chain and Ndel1 in assembly and activation of dynein** *NATURE COMMUNICATIONS*
  Okada, K., Iyer, B. R., Lammers, L. G., Gutierrez, P. A., Li, W., Markus, S. M., Mckenney, R. J.
  2023; 14 (1): 5833

- **Cohesin is required for meiotic spindle assembly independent of its role in cohesion in C. elegans** *PLOS GENETICS*
  McNally, K. P., Beath, E. A., Danlasky, B. M., Barroso, C., Gong, T., Li, W., Martinez-Perez, E., McNally, F. J.
  2022; 18 (10): e1010136

- **Evidence for anaphase pulling forces during C. elegans meiosis** *JOURNAL OF CELL BIOLOGY*
  Danlasky, B. M., Panzica, M. T., McNally, K. P., Vargas, E., Bailey, C., Li, W., Gong, T., Fishman, E. S., Jiang, X., McNally, F. J.
  2020; 219 (12)
