

## Hormoz Shahrzad

Graduate, Medicine, Psychiatry and Behavioral Sciences

---

### Bio

#### BIO

Hormoz has worked on many topics in evolutionary computation, both in theory and practice. His master's thesis focused on BLADE, a method for automatically focusing evolutionary search on the most promising part of the genome, with the search distributed over multiple hosts. He is currently a PhD candidate at UT Austin, continuing his research at the Cognizant AI Lab (<https://www.cognizant.com/us/en/ai-lab>) and as a visiting student researcher at Stanford University, where he is working on his dissertation.
