

Richard Zhuang

Masters Student in Computer Science, admitted Autumn 2025

Bio

BIO

I'm broadly interested in understanding and improving the capabilities of Large Language Models (LLMs) in a data-centric way. Specifically, I'm intrigued by how certain data "foster" skills that are essential for LLM agents (e.g. reasoning and planning). I have also had a long-standing passion in Sports Analytics. Outside the realm of AI, you will usually find me playing basketball!
