

Arvin Eslami

Research Associate, Medicine - Med/Immunology & Rheumatology

SUPERVISORS

- Saurabh Dahiya
- Zina Good

Bio

BIO

Arvin Eslami is a physician-scientist focused on cancer immunotherapy, with an emphasis on cellular therapies including CAR-T cells and tumor-infiltrating lymphocytes (TILs). His work lies at the interface of clinical and translational immunology, with a particular interest in understanding how patient-level clinical data and immune biomarkers influence treatment response, resistance, and toxicity.

He is especially interested in integrating multi-modal datasets—including clinical outcomes, immune profiling, and molecular data—to advance precision approaches in hematologic malignancies.

CURRENT ROLE AT STANFORD

Research Associate in the Division of Immunology & Rheumatology at Stanford University School of Medicine.

Responsibilities include supporting immunotherapy and cellular therapy research (CAR-T and TIL), clinical data organization, database management, and contribution to manuscripts, systematic reviews, and meta-analyses.

July 2025 – Present

HONORS AND AWARDS

- Award of the Best Student Research Association, Students' Scientific Research Center of TUMS (SSRC) (May 2018)

EDUCATION AND CERTIFICATIONS

- M.D., Tehran University of Medical Sciences (2021)

PROJECTS

- Immunotherapy and Cellular Therapy Research (CAR-T and TIL)
