Stanford

# Quan Maq Ma

Postdoctoral Scholar, Genetics

## Bio

### BIO

Quan (Maq) Ma is a postdoctoral researcher in the Department of Genetics at the Stanford School of Medicine. His research focuses on developing high-throughput sequencing technologies to study RNA modifications and identify substrates of RNA-binding proteins using biochemical and chemical biology approaches. Maq is also interested in the role of RNA editing in inflammatory chronic diseases.

### HONORS AND AWARDS

- Postdoctoral Support Award, Stanford Kidney Health Innovation Program (2026/06)
- Forbes China U30, Forbes China (2022/06)

### PROFESSIONAL EDUCATION

- Visiting Scholar, University of Pennsylvania , RNA chemical biology (2025)
- Ph.D., Zhejiang University , RNA modifications (2025)

### STANFORD ADVISORS

- Jin Li, Postdoctoral Faculty Sponsor
