- Contingent Employee, Medicine - Med/Nephrology
- Staff, Medicine - Med/Nephrology

Bio

BIO

Yusuf Ashktorab is a medical student (Class of 2028) at Howard University College of Medicine (HUCM). His journey in medicine is driven by a passion for using technology, to reduce health disparities and improve patient care.

He has contributed to projects at Stanford University, the University of California, San Francisco (UCSF), and the National Institutes of Health (NIH), focusing on topics such as predictive modeling for vaccine responses, the role of viruses in cancer development, and the use of Machine Learning and Large Language Models to diagnose Chronic Kidney Disease of Unknown Etiology (CKDu).

At HUCM, Yusuf serves as President of the Health Innovation and Technology (HIT) interest group and Vice President of Research and Technology for his class. In these roles, he is working to build a strong community centered on innovation and collaboration.
