Nurullah Demir

- Visiting Postdoc, Computer Science
- Affiliate, Program-Durumeric, Z.

Bio

BIO

I hold a PhD from KIT and am currently a Visiting Postdoctoral Scholar at Stanford University. Previously, I was a Visiting Scholar at UC Davis. My research focuses on Web Security and Privacy Measurements, Robust ML models, and Metascience. I work with the if(is) and Intellisec research groups. I am also a core maintainer of the open-source project HTTP Archive and currently lead the Web Almanac.

Beyond academia, I am the founder of the web agency webpen, which specialises in web development and digital solutions, and the project SecuSeek, focused on innovative web security solutions.
