

## Levi D. Palmer

Affiliate, Geballe Laboratory for Advanced Materials

### Bio

---

#### BIO

Levi Palmer is a postdoctoral fellow at Stanford beginning August 2026. As an Arnold O. Beckman Fellow and a Geballe Laboratory for Advanced Materials (GLAM) Fellow, he is working with Professors Kate Reidy, Colin Ophus, and Stacey Bent to develop in situ microscopy methods to image materials growth, performance, and failure at atomic scales.

Prior to his time at Stanford, Levi was an NSF Graduate Research Fellow at Caltech. He completed his Ph.D. in Chemistry under Professor Scott Cushing to image carrier and heat dynamics in photocatalysts by developing ultrafast electron energy-loss spectroscopy (EELS) methods. During his Ph.D., he also received a DOE Office of Science Graduate Student Research (SCGSR) Fellowship to work at Argonne National Laboratory with Dr. Thomas Gage. He earned his B.S. in Chemistry from the University of Minnesota – Twin Cities and studied under Professor Renee Frontiera.
