Bio

BIO

Director, Pediatric Glaucoma Service

Global Director, Pediatric Glaucoma

Dr. Alana Grajewski is a leader in the care of adults with glaucoma, and is world-renowned for the treatment of childhood glaucoma.

Dr. Grajewski's love of medicine began as an undergraduate at Stanford University during her Medical Microbiology studies and while performing microsurgery in the world's first sleep disorder clinic with Dr. William Dement. She completed her MD at the Rosalind Franklin University Chicago Medical School and earned residency training at the Wills Eye Institute Department of Ophthalmology, and followed this with a double fellowship in glaucoma at the Bascom Palmer Eye Institute.

In 2011, she created the Childhood Glaucoma Research Network (CGRN), the first international research consortium on pediatric glaucoma with the goal of unifying its diagnostic criteria in an internationally accepted classification system. This work led to the editing and publishing of two textbooks on both the consensus for pediatric glaucoma and its clinical and surgical management. Her work in adult and pediatric glaucoma has resulted in the authoring of 25 book chapters and more than 400 lectures and presentations around the world.

While searching for pediatric glaucoma in the Caribbean in 2018, Dr. Grajewski created the world's first program for vision screening of infants and children tied to a national vaccination program, the Pediatric Preventable Blindness Initiative (PPB). Beyond her clinical and research interests Dr. Grajewski has founded multiple nonprofits and several organizations dedicated to improving ophthalmologic care in the US and abroad.

Her dedication and excellence in care has been recognized by peers and grateful patients alike:
