Bio

BIO

I received a PhD and 2 MS degrees at Stanford (advisor John Cioffi) in 2002 following my BS at Caltech 1992-1996.

I'll be an research affiliate working with Professor Subhasish Mitra and John Cioffi through July, 2026.

I worked in a variety of capacities spanning chipsets to end-user products / AI systems. My areas of interest are AI, algorithms, signal processing, and their intersection with the physical world.

After 25 years of industry, it is exciting to be back on the farm. Thank you Professors Mitra and Cioffi for making this possible.
