Bio

BIO

Dr. Somer L. Bishop is a licensed clinical psychologist at Stanford Health Care and a professor in the Department of Psychiatry and Behavioral Sciences, Division of General Psychiatry and Psychology and the Division of Child and Adolescent Psychiatry and Child Development, at Stanford University.

As an attending psychologist in adult psychiatry, and child and adolescent psychiatry, Dr. Bishop assesses and treats a range of conditions, with a focus on neurodevelopmental disorders in children and adults.

Dr. Bishop is conducting research to develop tools to assess social-communication and other behavioral strengths and challenges in people with autism spectrum disorders (ASD), attention-deficit/hyperactivity disorder, intellectual disabilities, and other conditions. Her research explores how individual and contextual factors affect the measurement of autism symptoms across the lifespan.

In addition, she conducts research on the psychological health of adolescents and adults with ASD, such as investigating how positive and negative social experiences relate to depressive symptoms

She has coauthored numerous peer-reviewed publications and book chapters and regularly presents her work at scientific conferences.

Dr. Bishop is a member of the American Psychological Association (APA), Baby Siblings Research Consortium (BSRC), Down Syndrome Medical Interest Group-USA (DSMIG-USA), INSAR, and the UK-based Society for the Study of Behavioural Phenotypes (SSBP). She is currently president of the Bay Area Autism Consortium (BAAC).
