

Stanford

Beverly Jazmine Delgado

Research Coordinator, Dermatology

Bio

BIO

I'm a Research Coordinator at Stanford University, with over three years of experience in medical research and technology development. My work at Wipe Out Melanoma - California (WOM-CA) focuses on the importance of healthcare access and leveraging technology for early detection of melanoma.

I've worked in human subject research involving wearable devices and led hands-on training for study procedures, including data collection and handling. I'm passionate about applying real-life solutions to modern social and healthcare challenges. I'm skilled in data & project management and fluently speak Spanish.

EDUCATION AND CERTIFICATIONS

- B.S. in Biomedical Engineering, Tecnológico de Monterrey (2024)
