Stanford

Eric Marxmiller

Advanced Lecturer, Emergency Medicine

Bio

BIO

I'm Eric Marxmiller, a registered paramedic and Advance Lecturer in the Department of Emergency Medicine, where I also serve as Program Director for Stanford EMS (StEMS) and numerous EMS education classes. I hold paramedic registrations in both the United States and the United Kingdom through the Health and Care Professions Council (HCPC), and maintain active clinical practice in San Francisco's 911 system.

My career spans over two decades in emergency medicine, from my start as an EMT in 2001 through paramedic certification in 2014, with experience ranging from 911 response and interfacility transport to expedition and event medicine across seven continents. I frequently work as a consultant in executive protection and event medical services on a global basis. As founder of multiple medical service organizations, I've combined frontline clinical work with education and innovation in EMS, contributing to the field through teaching, program development, and entrepreneurial ventures focused on advancing prehospital care.

ACADEMIC APPOINTMENTS

- Advanced Lecturer, Emergency Medicine

Teaching
