Bio

BIO

I'm a neuroradiologist and data scientist at Stanford. I care for patients at Stanford Children's Hospital and build intelligent systems for fetal and pediatric neuroimaging.

I'm passionate about how the fetal brain develops and how diseases such as genetic and metabolic disorders can disrupt that process. I'm building intelligent systems that chase the moving fetus inside the MRI scanner, capturing sharper and more advanced images of the developing brain.

Outside the hospital, I'm a ballroom dancer and have competed for the Harvard, Yale, and MIT ballroom dance teams. I also enjoy calisthenics, hiking, and tennis.
