### Bio

#### BIO

I am currently a rising senior at University High School, Irvine CA and a biomedical engineering aspirant.

I am the Co-founder of Irvine Hope ([www.IrvineHope.net](http://www.IrvineHope.net)), a non profit organization working globally for creating awareness about climate change and disease challenges.

Me and my twin sister have worked in India, Bangladesh, Myanmar, Malawi and Mozambique for raising awareness about significant health issues and disparities. Here at home, we work with the Advocates for the African American Elders in a federal funded study.

I am an OCSEF First Place winner and California State Finalist (CSEF) for Physiology/Medicine Science (2024 and 2026) and Second Place winner of the IUSD Science Fair competition in 2024 and 2025; First Place in 2026.

I have completed a research internship at University of California, San Diego, Department of Pediatrics (Mentor Dr. Philip Hartmann and Dr. Berndt Schnabl)

I published an article in American Journal of Physiology-Liver and Gastrointestinal Physiology) in 2025.
