Michel Schimpf

Graduate, Medicine, Dermatology

Bio

BIO

Michel Schimpf is a PhD candidate affiliated with Stanford and Cambridge, working at the intersection of AI and Psychology. His research investigates how large language model-based systems can be used to scale behavior change interventions, with a focus on goal setting, dietary behavior, and emotional well-being. Michel has a background in Computer Science, completing his Bachelor's at TUM with a minor in Psychology at LMU Munich. He previously worked on alignment research at Mistral. Alongside his academic work, he co-founded wahl.chat, a chatbot for political education that reached over 250,000 users, and Techdalo, a nonprofit teaching programming skills to Colombian students.
