Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My health services and implementation research aims at improving processes and outcomes of mental health care for veterans other people suffering from post-traumatic stress and other mental disorders.

My primary focus is improving access to evidence-based treatments PTSD and other psychiatric disorders. My second emphasis is using telemedicine technologies to expand access to effective care. My third interest is measurement-based care, using ongoing data on patient progress to inform patients' and clinicians' decisions.
