Publications

PUBLICATIONS

- **MIXPRS enables multi-population and multi-method polygenic risk scores using summary statistics.** *Nature genetics*
  Xu, L., Dong, Y., Zeng, X., Bian, Z., Zhou, G., Guan, L., Zhao, H.
  2026
- **Leveraging cell-type specificity and similarity improves single-cell eQTL fine-mapping.** *Nature communications*
  Lin, C., Lin, Y., Li, W., Xu, L., Zhang, X., Zhao, H.
  2026
- **Improving polygenic risk prediction performance by integrating electronic health records through phenotype embedding** *AMERICAN JOURNAL OF HUMAN GENETICS*
  Xu, L., Zheng, W., Hu, J., Lin, Y., Zhao, J., Wang, G., Liu, T., Zhao, H.
  2025; 112 (12): 3030-3045
- **Differential results of genetic risk scoring for multiple sclerosis in European and African American populations.** *Multiple sclerosis (Houndmills, Basingstoke, England)*
  Rivier, C. A., Xu, L., Clocchiatti-Tuozzo, S., Zhao, H., Ohno-Machado, L., Hafler, D. A., Falcone, G. J., Longbrake, E. E.
  2025; 31 (11): 1304-1313
- **JointPRS: A data-adaptive framework for multi-population genetic risk prediction incorporating genetic correlation.** *Nature communications*
  Xu, L., Zhou, G., Jiang, W., Zhang, H., Dong, Y., Guan, L., Zhao, H.
  2025; 16 (1): 3841
- **Integrated longitudinal multiomics study identifies immune programs associated with acute COVID-19 severity and mortality.** *The Journal of clinical investigation*
  Gygi, J. P., Maguire, C., Patel, R. K., Shinde, P., Konstorum, A., Shannon, C. P., Xu, L., Hoch, A., Jayavelu, N. D., Haddad, E. K., Reed, E. F., Kraft, M., McComsey, et al
  2024; 134 (9)
