Thanks for visiting! I recently completed my doctoral studies at the Faculty of Business and Economics, TU Dortmund University, under the supervision of Professor Carsten Jentsch. Before that, I earned an M.Sc. in Economics from the University of Mannheim and a B.B.A. from BRAC University, Bangladesh, with a second major in Economics. Following my Bachelor's, I worked as a Project Assistant at Innovations for Poverty Action (IPA) Bangladesh on Building Management Hierarchies for Growth in LICs: Understanding the Role of Supervisor Training in the Bangladeshi Garment Sector.

My research lies at the intersection of causal inference, econometrics, and machine learning. In my dissertation I worked with adaptive experiments a.k.a. bandit algorithms under interference, both theoretical and applied perspectives.
