

Antoine Breton

Graduate Visiting Researcher Student, Materials Science & Engr(GRVR)

Bio

BIO

Antoine Breton is a cybersecurity engineer turned battery-tech researcher. He spent three years working as an offensive security engineer in Germany, before shifting into secure computing research - his master's thesis explored running WebAssembly workloads inside Trusted Execution Environments (TEEs). He's currently a Visiting Researcher at Stanford's STEER program, working on OpenCell, an open platform for battery design, cost intelligence, and technology roadmapping for gigafactories.
