Affiliate, Rad/Integrative Biomedical Imaging Informatics at Stanford

Bio

BIO

I am Selena Li and I am a high school student from Little Rock, Arkansas. I want to find new ways AI can help alleviate administrative and workflow tasks for doctors, so they have more time to focus on their patients. I am also curious about how research data and machine learning can uncover patterns that humans might not be able to notice. In my free time, I enjoy playing piano, gaming, calisthenics, and watching movies.
