Stanford

Levi "Veevee" Cai

Affiliate, Oceans

Bio

BIO

Veevee is an incoming assistant professor in the Oceans Department, Fall 2027. His lab will be accepting PhD students and postdocs starting then.

His research aims to develop autonomous systems through machine learning and robotics innovations to enable persistent and large-scale monitoring, conservation, and exploration of ocean ecosystems.

He completed his PhD on marine robotics for animal monitoring in the MIT-WHOI Joint Program working with Dr. Yogesh Girdhar and Prof. Daniela Rus. He is currently a postdoc at the University of Colorado at Boulder working with Esther Rolf on AI for Earth Observations, especially in dynamical systems and oceans.
