Roderick Tan

M-TRAM Operations & Program Administrator, Med/TRAM

Bio

BIO

Roderick Tan is a University of California, Berkeley graduate with a Bachelor of Arts in Data Science (2025) and experience in higher education administration, program coordination, and operations management.

During his time at UC Berkeley, Roderick supported the Berkeley School of Education, where he coordinated educational programs, managed large-scale events, developed administrative resources, and supported initiatives that expanded access to scholarships and educational opportunities. He also contributed to alumni engagement, program communications, staff training, and operational improvements.

Additionally, through his work with Classroom Technology Services at UC Berkeley, Roderick developed technical expertise in audiovisual systems, classroom technology, and IT support, providing maintenance and troubleshooting across more than 200 classrooms. His experience combines analytical problem-solving, operational coordination, and a strong commitment to supporting academic and educational communities.

Roderick's professional interests include higher education administration, program development, operations management, and the intersection of data, technology, and education.
