Alex Sarkosh

Clinical Research Intern, Anesthesiology & Pain Medicine, Anesthesia - Education

Bio

BIO

Alex Sarkosh is a clinical research intern in Dr. Creed Starry's laboratory at Stanford University, where he contributes to interdisciplinary translational research spanning pain medicine, stroke, neuroscience, and neurological disorders. The laboratory's research intersects Anesthesiology, Pain Medicine, Ophthalmology, and Neuroscience, with an emphasis on understanding complex neurological conditions and advancing clinical research. His academic interests include clinical medicine, neuroscience, human physiology, and the mechanisms underlying neurological conditions and pain. He has also completed clinical skills training in sterile technique, surgical knot tying, local anesthesia, and wound closure.
