

Dr. G. Scott Hubbard

Affiliate, Aeronautics and Astronautics

Bio

BIO

Dr. Hubbard's research interests include the study of both human and robotic exploration of space with a particular focus on technology and missions for planetary exploration, especially Mars. Prof. Hubbard is also an expert on the emerging entrepreneurial space industry and is the Director Emeritus of the Stanford Center of Excellence for Commercial Space Transportation (COE CST). As part of his ongoing engagement with robotic Mars missions, Hubbard serves as a member of National Academy of Science review groups and as a frequent consultant to NASA projects. Current topics include the Mars Sample Return architecture and studying the infusion of science objectives into human exploration missions. Dr. Hubbard's commercial space interests examine policies to enable, facilitate and promote such ventures. As the former Director of NASA's Ames Research Center, he maintains an active connection to the space exploration community. Hubbard is also the Founding Editor-in-Chief of the peer-reviewed journal *New Space*.

Brief Biography: Dr. Scott Hubbard has been a leader in space exploration for almost 50 years. His career includes a National Lab, a start-up venture, NASA, and Stanford. At NASA, Dr. Hubbard is best known as Director of NASA's Ames Research Center, the first Mars Program Director (aka the "Mars Czar"), and the founder of NASA's Astrobiology Institute. As the sole NASA member of the Columbia Accident Investigation Board (CAIB), Hubbard's work demonstrated the definitive technical cause of the accident. At Stanford, Hubbard has been very active in the emerging entrepreneurial space enterprise, establishing a peer-reviewed journal *New Space*, and creating the Stanford Center of Excellence for Commercial Space Transportation. From 2012 to 2023 Hubbard chaired the SpaceX Commercial Crew Safety Advisory Panel. Although now retired from teaching and advising he continues to serve on various committees for the National Academy, NASA and other groups. He is the author of the award winning "Exploring Mars: Chronicles from a Decade of Discovery" and his many honors include eight NASA medals including NASA's highest recognition, the Distinguished Service Medal. Dr. Hubbard is also an Honorary Fellow of the AIAA. A brief video of Hubbard's career may be viewed at <https://vimeo.com/172038243>. More background is available at <https://gscotthubbard.com/> including Hubbard's lifelong passion for playing music.

Selected Honors

- 2022 Elected Cosmos Club, Distinguished in Space Science
- 2019 Honorary Fellow, American Institute of Aeronautics and Astronautics (AIAA)
- 2018 Vanderbilt Student Media Hall of Fame
- 2016 Henry Clay Distinguished Kentuckian Award
- 2016 NASA Exceptional Public Service Medal for NASA Advisory Council
- 2013 Kentucky Aviation Museum Hall of Fame
- 2013 Bronze Medal in Science; "Exploring Mars", Independent Publishers Book Awards
- 2007 Challenger Learning Center Distinguished Achievement Award.

- 2006 Carl Sagan Memorial Award by the American Astronautical and Planetary Societies
- 2006 Presidential Meritorious Rank Senior Executive
- 2006 Doctor Honoris Causa Polytechnic University of Madrid
- 2005 NASA Exceptional Service Medal for Columbia Accident Board report
- 2004 Distinguished Service Medal (NASA's Highest Award) for demonstrating the physical cause of the Columbia accident
- 2004 Engineering Science Award, International Academy of Astronautics
- 2004 Von Kármán medal in the field of Astronautics
- 2003 Elected Fellow, AIAA
- 2002 NASA Outstanding Leadership Medal for Mars Odyssey
- 2001 NASA Exceptional Achievement Medal for Mars Program Restructuring
- 1999 NASA Outstanding Leadership Medal for Lunar Prospector Mission
- 1998 "Laurels" from Aviation Week for Lunar Prospector
- 1998 NASA Outstanding Leadership Medal for Mars Pathfinder Project
- 1997 "Laurels" from Aviation Week for Mars Pathfinder
- 1994 NASA Exceptional Achievement Medal for creation of Mars Pathfinder mission.
