Bio

BIO

Dr. Volkov has over sixteen years of experience in constrained optimization applied research. After receiving his M.Sc. degree in Mechanical Engineering (Ecole Polytechnique de Montreal) and a Ph.D. degree in Applied Mathematics (University of Montreal), he then worked on industrial contracts related to the optimal control of phase transition systems and optimal design of porous media. Subsequently, Dr. Volkov served a one-year fixed term at the rank of an Assistant Professor in Physics at St. Francis Xavier University in Nova Scotia. His current research interests include the implementation and refinement of gradient-based optimization methods in application to hydrocarbon field development.
