Stanford

Maryellen Petrich

Digital Preservation Analyst, LOCKSS Program

Bio

CURRENT ROLE AT STANFORD

Mary-Ellen facilitates the digital preservation process for LOCKSS and CLOCKSS. She coordinates scheduling to ensure timely harvesting of digital content, aligning with project goals to preserve essential academic materials. In addition to monitoring and evaluating the quality of the preservation catalog, she implements quality control measures while testing and evaluating digital preservation software. Mary-Ellen collaborates with internal teams and external partners to address issues and enhance workflow. Through data analysis and reporting, she tracks preservation progress and identifies opportunities to improve digital preservation initiatives.
