BIO

Dr. Fortmann received his undergraduate education at Stanford University and attended medical school at the University of California, San Francisco. He joined the Stanford Medical School faculty in 1983 in the Stanford Heart Disease Prevention Program (later and currently the Stanford Prevention Research Center or SPRC). His research focus is on cardiovascular disease prevention at the population and individual levels. He was director of the Stanford Five-City Project (Dr. John W. Farquhar, Principal Investigator) from 1981 to 1997. He became the C. F. Rehnborg Professor in Disease Prevention and Director of the SPRC in 1998. He retired from the Stanford Medical Faculty in 2010 and is now continuing his research program at the Kaiser Permanente Center for Health Research in Portland, Oregon.

CURRENT RESEARCH AND SCHOLARLY INTERESTS

In 2010, Dr. Fortmann retired from Stanford (after 30 years) and moved to the Kaiser Permanente Center for Health Research in Portland, Oregon (<http://www.kpchr.org/>). He continued his research on population health there, including a study of the effects of light rail transportation on health and health care costs, promotion of exercise in primary care clinics, and the epidemiology of cardiovascular disease in Asian Subpopulations. During the COVID pandemic he served as Site Principal Investigator for several; vaccine trials tor Kaiser Permanente members.

Dr. Fortmann also served in several administrative roles in the Center for Health Research, including Senior Director of the Science Program Department and Interim Director of the Center and Vice President for Research for Kaiser Permanente Northwest.

Dr, Fortmann retired from Kaiser Permanente in November 2025 and his research activity is minimal, finishing minor tasks associated with his past research.
