Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My research interests include

1) The cost-effectiveness of new cardiovascular technologies.

Example: tests to screen asymptomatic patients for left ventricular systolic dysfunction.

2) Interventions to improve the quality of care of patients with heart disease. Examples: include clinical reminders and home monitoring.

3) Outcomes research using existing clinical and administrative datasets.

4) Use of echocardiography to predict prognosis (e.g. diastolic dysfunction).
