Bio

BIO

Dr. Hinton is a board-certified dermatologist who provides care at Stanford Health Care Dermatology Clinics in Castro Valley, Livermore, and Redwood City. She is also a clinical assistant professor in the Department of Dermatology at Stanford University School of Medicine.

Dr. Hinton diagnoses and treats a wide range of general dermatologic skin conditions, including acne, eczema, psoriasis, and skin cancer. She also performs dermatologic surgery. She has a particular interest in hair loss (alopecia) and restoration, including the treatment of scarring, non-scarring, and chemotherapy-induced alopecia across all hair textures.

Dr. Hinton's research interests include side effects of cancer (oncologic) treatment that impact the skin (cutaneous side effects), including chemotherapy-induced alopecia. Her other research interests include digital health and patient access. Prior to starting her medical training, she researched state public insurance models and health disparities.

Dr. Hinton has published her research in numerous peer-reviewed journals, including The Journal of Allergy and Clinical Immunology: In Practice and JAMA Dermatology. She has also published her work in Journal of the American Academy of Dermatology and British Journal of Dermatology. Dr. Hinton has presented to her peers at national and regional meetings, including the New England Dermatological Society Clinical Meeting.
