Bio

BIO

Dr. Loening is both a clinical radiologist and an active researcher focused on expanding the capability of magnetic resonance (MR) for imaging the lymphatic system and other organs within the body. His clinical research focuses on: 1) refining MR lymphangiography techniques to improve the evaluation of lymphatic disease, 2) applying novel or improved MR sequences and reconstruction mechanisms to increase the speed, robustness, and diagnostic capability of body MR protocols, and 3) application of advanced diffusion weighted imaging (DWI) techniques in prostate imaging. His translational research focuses on exploring new MR contrast mechanisms and contrast agents, such as for targeted lymphatic imaging and the stratification of cancer within the prostate.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

My lab focuses on expanding the capability of MR and PET/MR as it relates to applications in body imaging. Clinical research aims include the application of new or improved MR sequences to increase the speed, robustness, and diagnostic capability of body MR. Translation research aims include exploring new MR contrast mechanisms and contrast agents, such as for the stratification of cancer within the prostate and the evaluation of the lymphatic system.
