Bio

BIO

Christopher Almond, MD, MPH is Professor of Pediatrics in the Division of Cardiology at the Stanford University School of Medicine where he is a board-certified pediatric cardiologist at Stanford's Lucile Packard Children's Hospital in Palo Alto, CA. His clinical and research interests are focused on pediatric heart failure, mechanical circulatory support, heart transplantation, and anticoagulation. He completed his training in pediatrics, cardiology, and a senior fellowship in heart failure/transplant at Boston Children's Hospital before before appointment as Assistant Professor of Pediatrics at Harvard Medical School/Boston Children's Hospital. Dr. Almond completed his MPH at the Harvard School of Public Health with a focus on statistics and epidemiology (study design for rare diseases) followed by a Medical Device Fellowship at the FDA in the Division of Cardiovascular Devices at CDRH. Dr. Almond moved to Stanford in 2014 where he currently serves as professor of pediatrics and directs the clinical research program within Pediatric Advanced Cardiac Therapies (PACT) Program. He also serves as Medical Director of the Children's Heart Center Anticoagulation Management Program at Stanford (CHAMPS). Dr. Almond has a passion for collaborative research serving as PI for federally-funded multi-center clinical trials including the Berlin Heart ventricular assist device (VAD) FDA Trial that led to its FDA approval in 2011, the TEAMMATE (everolimus for heart transplant) Trial, the TROLLEY (Cardiohelp ECMO/anticoagulation RCT in heart failure) Trial, the NHLBI PumpKIN (Jarvik 2015 LVAD) Trial, and the SPOT BIAS Trial, an FDA-funded trial to understand racial/pigment bias in commercial pulse oximeters.
