

Elizabeth Kessler

Advanced Lecturer
American Studies

Bio

BIO

Elizabeth Kessler's research and teaching focus on twentieth and twenty-first century American visual culture. Her diverse interests include: the role of aesthetics, visual culture, and media in modern and contemporary science, especially astronomy; the interchange between technology and ways of seeing and representing; the history of photography; and the representation of fashion in different media. Her first book, *Picturing the Cosmos: Hubble Space Telescope Images and the Astronomical Sublime*, on the aesthetics of deep space images, was published in 2012. She's currently writing on book on extraterrestrial time capsules, as well as developing a new project on fashion photography.

ACADEMIC APPOINTMENTS

- Advanced Lecturer, American Studies

ADDITIONAL PROGRAM AFFILIATIONS

- Modern Thought and Literature

PROFESSIONAL EDUCATION

- BA, University of Notre Dame , English
- MA, University of Illinois, Chicago , Art History
- PhD, University of Chicago , History of Culture

Teaching
