Rakesh Bam
Research Scientist, Rad/Pediatric Radiology

Publications

PUBLICATIONS

- Efficacy of affibody-based ultrasound molecular imaging of vascular B7-H3 for breast cancer detection. *Clinical cancer research : an official journal of the American Association for Cancer Research*
  2020

- Affibody-Indocyanine Green Based Contrast Agent for Photoacoustic and Fluorescence Molecular Imaging of B7-H3 Expression in Breast Cancer. *Bioconjugate chemistry*
  Bam, R., Laffey, M., Nottberg, K., Lown, P. S., Hackel, B. J., Wilson, K. E.
  2019

- Cell-based selections aid yeast-display discovery of genuine cell-binding ligands: Targeting oncology vascular biomarker CD276
  Stern, L., Lown, P., Kobe, A., Abou-Elkacem, L., Bam, R., Willmann, J., Hackel, B.
  AMER CHEMICAL SOC.2019

- Reciprocal Crosstalk Between YAP1/Hippo Pathway and the p53 Family Proteins: Mechanisms and Outcomes in Cancer. *Frontiers in cell and developmental biology*
  Raj, N., Bam, R.
  2019; 7: 159

- Inhibition of IRE1 results in decreased scar formation. *Wound repair and regeneration : official publication of the Wound Healing Society [and] the European Tissue Repair Society*
  Boyko, T. V., Bam, R., Jiang, D., Wang, Z., Bhatia, N., Tran, M. C., Longaker, M. T., Koong, A. C., Yang, G. P.
  2018

- Hypoxia-Induced Endoplasmic Reticulum Stress Tumor Hypoxia
  Chou, C., Bam, R., Yang, Z., Bui, J., Jiang, D., Koong, A.
  World Scientific.2017

- Identification of Doxorubicin as an Inhibitor of the IRE1a-XBP1 Axis of the Unfolded Protein Response. *Scientific reports*
  2016; 6: 33353-?

- Primary myeloma interaction and growth in coculture with healthy donor hematopoietic bone marrow *BMC CANCER*
  Bam, R., Khan, S., Ling, W., Randal, S. S., Li, X., Barlogie, B., Edmondson, R., Yaccoby, S.
  2015; 15

- CYR61/CCN1 overexpression in the myeloma microenvironment is associated with superior survival and reduced bone disease *BLOOD*
  Johnson, S. K., Stewart, J. P., Bam, R., Qu, P., Barlogie, B., van Rhee, F., Shaughnessy, J. D., Epstein, J., Yaccoby, S.
  2014; 124 (13): 2051-2060

- Role of Bruton’s tyrosine kinase (BTK) in growth and metastasis of INA6 myeloma cells *BLOOD CANCER JOURNAL*
  Bam, R., Venkateshaiah, S. U., Khan, S., Ling, W., Randal, S. S., Li, X., Zhang, Q., van Rhee, F., Barlogie, B., Epstein, J., Yaccoby, S.
  2014; 4

- Role of Bruton’s tyrosine kinase in myeloma cell migration and induction of bone disease *AMERICAN JOURNAL OF HEMATOLOGY*
  Bam, R., Ling, W., Khan, S., Pennisi, A., Venkateshaiah, S. U., Li, X., van Rhee, F., Usmani, S., Barlogie, B., Shaughnessy, J., Epstein, J., Yaccoby, S.
NAMPT/PBEF1 enzymatic activity is indispensable for myeloma cell growth and osteoclast activity *EXPERIMENTAL HEMATOLOGY*
Venkateshiah, S. U., Khan, S., Ling, W., Bam, R., Li, X., van Rhee, F., Usmani, S., Barlogie, B., Epstein, J., Yaccoby, S.
2013; 41 (6): 547-557

PRESENTATIONS
- Inhibition of IRE1-XBP1 Signaling Results in Reduced Tumor Growth and Metastasis of Breast Cancer - 15th International Tumor Microenvironment Workshop
- Sustained growth of primary myeloma cells in coculture with whole donor bone marrow is associated with induced secretion of the microenvironmental mediator of cytokinesis, Hemicentin-1. - American Society of Hematology (December 2013)
- Inhibition of BTK activity in myeloma cells within a supportive microenvironment promotes their growth but suppresses metastasis. - American Society of Hematology (December 2013)
- Healthy donor whole bone marrow cells preconditioned with myeloma patient serum support long-term survival of primary myeloma and reveal altered microenvironmental pathways. - American Society of Hematology (December 2013)
- Macrophages activation by ICAM1 antibody combined with Lenalidomide has enhanced anti-myeloma activity in a supportive microenvironment in vivo and in vitro. - American Society of Hematology (December 2013)
- Primary myeloma plasma cells are capable of growth in adult, normal whole human bone marrow environment. - American Association for Cancer Research (April 2013)
- Cell surface CXCR4 and BTK expression are associated in myeloma cells and osteoclast precursors and mediate myeloma cell homing and clonogenicity, and osteoclastogenesis. - American Society of Hematology (December 2011)
- Deregulated cellular iron metabolism factors mediate iron overload in myeloma cells and osteoclasts, and promote myeloma growth and bone disease. - American Society of Hematology (December 2011)
- BTK mediates SDF-1-induced migration of myeloma cells and osteoclast precursors, osteoclastogenesis and myeloma cell clonogenicity. - American Society for Bone and Mineral Research (September 2011)
- Binding of NS3 helicase to single-stranded/double-stranded DNA junctions. - Annual Biomedical Research Conference for Minority Students (November 2007)
