COMMUNITY AND INTERNATIONAL WORK

- Stanford Mayfield Fellows
- Stanford India Biodesign

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Primary and secondary prevention of disease through the use of preventive genomic medicine. Patients who have greater insight into their genetic risk for different diseases may change their lifestyles and decrease their probablity of succumbing to conditions such as diabetes and cardiovascular events. Personalized screening regimens for those at increased genetic risk, such as for colon cancer, is another important application worthy of validation.
