Bio

BIO

I am a gastroenterologist and clinical researcher at Stanford University who seeks to improve the prevention and early detection of digestive malignancies. I have a particular interest in gastric precancerous lesions (such as gastric intestinal metaplasia) which give rise to stomach cancer. My research is aimed at improving digestive cancer outcomes through data science, cohort building, biomarker development, and biomarker clinical translation. Our group conducts patient-facing studies, EHR-based studies, large database studies, and bio-repository studies.

Beyond my scholarly work, I am a therapeutic endoscopist, with sub-specialty training in advanced endoscopic procedures. I maintain a robust endoscopic practice of surveying gastric precancerous lesions.
