Brittany Flowers
Ph.D. Student in Cancer Biology, admitted Autumn 2015

Publications

PUBLICATIONS

- **Cell of Origin Influences Pancreatic Cancer Subtype** *CANCER DISCOVERY*
  2021; 11 (3): 660–77

- **Deconstructing the origins of PDAC development.**
  Flowers, B., Xu, H., Hanson, K., Curtis, C., Vogel, H., Wood, L., Attardi., L. D.
  AMER ASSOC CANCER RESEARCH.2020: 19

- **Deciphering the origins of PDAC development**
  AMER ASSOC CANCER RESEARCH.2019

- **Elucidating the role of p53 in the cellular origins of pancreatic cancer development**
  AMER ASSOC CANCER RESEARCH.2019

- **Deconstructing p53 pathways in tumor suppression.**
  AMER ASSOC CANCER RESEARCH.2018: 17

- **Understanding the role of the tumor suppressor p53 in pancreatic cancer development.**
  AMER ASSOC CANCER RESEARCH.2018: 44–45

- **Reconstituting development of pancreatic intraepithelial neoplasia from primary human pancreas duct cells.** *Nature communications*
  2017; 8: 14686–7

- **A p53 Super-tumor Suppressor Reveals a Tumor Suppressive p53-Ptpn14-Yap Axis in Pancreatic Cancer.** *Cancer cell*
  2017; 32 (4): 460–73.e6

- **Reconstituting development of pancreatic intraepithelial neoplasia from primary human pancreas duct cells** *Nature Communications*
  2017; 8: 14686

- **MK-STYX Alters the Morphology of Primary Neurons, and Outgrowths in MK-STYX Overexpressing PC-12 Cells Develop a Neuronal Phenotype.** *Frontiers in molecular biosciences*
  2017; 4: 76

- **The pseudophosphatase MK-STYX induces neurite-like outgrowths in PC12 cells.** *PloS one*
  2014; 9 (12): e114535
