Bio

Stephen Comello leads the Energy Business Innovation focus area at Stanford Graduate School of Business. He is also a senior fellow at the Stanford University’s Steyer-Taylor Center for Energy Policy and Finance, and a research lead at the Bits & Watts Initiative. His work examines the organization of innovation and how technology and policy coevolve to influence the economic attractiveness of advanced energy solutions. Within his current portfolio, he explores policy and business model innovation within the electricity sector, with one set of projects focusing on how digital platform technology diffusion intersects with structural changes in the industry.
