### Bio

#### ACADEMIC APPOINTMENTS

- Professor Emeritus, Medicine - Oncology
- Member, Stanford Cancer Institute

#### ADMINISTRATIVE APPOINTMENTS

- Deputy Director, Stanford Cancer Center, (2005-2008)
- Director, Stanford Cancer Institute, (2008-2018)

#### HONORS AND AWARDS

- National Academy of Sciences, Institute of Medicine (Inducted 2001)
- Fellow, American Association for the Advancement of Science (2015)
- Member, Association of American Professors (1991)
- Member, American Society for Clinical Investigation (to present)
- President, American Society of Hematology (2001)
- Mentorship Award, American Society of Hematology (2012)
- Walter Hewlitt Physician Scientist Award, Stanford Department of Medicine (2012)

### Research & Scholarship

#### CURRENT RESEARCH AND SCHOLARLY INTERESTS

Beverly S. Mitchell, MD, is the former Director of the Stanford Cancer Institute and is the George E. Becker Professor of Medicine at Stanford University. Before joining the Stanford faculty, Dr. Mitchell lead the Molecular Therapeutics Program at UNC Chapel Hill's Lineberger Comprehensive Cancer Center, where she also served as Associate Director for Translational Research and Chief of the Division of Hematology/Oncology. She has authored over 130 peer-reviewed articles. She served as President of the American Society of Hematology (ASH) and was Chair of the Medical and Scientific Affairs Committee and Vice Chair for Medical and Scientific Affairs of the Leukemia and Lymphoma Society of America.

Dr. Mitchell's current research relates to the development of new therapies for hematologic malignancies. She is interested in preclinical proof of principle studies on mechanisms inducing cell death and on metabolic targets involving nucleic acid biosynthesis in malignant cells. Recent studies have focused on the role of nucleolar proteins in cellular stress responses, including that induced by reactive oxygen species. She is also interested in the regulation of ribosomal RNA synthesis in hematopoietic stem and progenitor cells and in the role of dysregulated synthesis in bone marrow failure syndromes. In addition, her laboratory is involved in the translation of these studies into scientifically designed clinical trials.

## CLINICAL TRIALS

- Phase I CAMELLIA: Anti-CD47 Antibody Therapy in Relapsed/Refractory Acute Myeloid Leukaemia, Not Recruiting
- Phase II Arsenic Trioxide in Relapsed and/or Refractory AML & Mutated Nucleophosmin 1 (NPM1) Gene, Not Specified

## Teaching

---

## GRADUATE AND FELLOWSHIP PROGRAM AFFILIATIONS

- Cancer Biology (Phd Program)
- Chemical and Systems Biology (Phd Program)
