A Stanford faculty member since 2005, Professor Berek is renowned for his many contributions to and expertise in gynecologic oncology, especially surgical innovation and techniques, and his research in immunology and immunotherapy. Through many laboratory and clinical investigations, he pioneered the use of regionally-administered immunotherapy in ovarian cancer patients. His early laboratory research focused on fundamental mechanisms of cancer immunology, elucidating growth regulatory pathways for cytokines and their receptors. His current research focuses on clinical trials of novel therapies and immunotherapies for ovarian cancer and collaborations on new diagnostics, screening techniques, and genetics.

An author and editor, Professor Berek has published more than 360 peer-reviewed manuscripts in the scientific literature, and numerous book chapters and monographs. His books, Berek & Hacker's Gynecologic Oncology, now in its 7th edition, and Berek & Novak's Gynecology, in its 17th edition, are leading texts in the field. He is the Series Editor for Operative Techniques in Gynecologic Surgery, for which five textbooks on various subspecialty topics in Obstetrics and Gynecology have been published. He serves as the Editor-in-Chief for Current Opinion in Obstetrics & Gynecology, and he is a former Editor-in-Chief of ASCO Connection, published by the American Society of Clinical Oncology.

Professor Berek received his Bachelor of Arts degree in English Literature and Theatre Arts, and a Master of Medical Sciences degree in biomedical sciences from Brown University. After earning his Doctor of Medicine from Johns Hopkins University School of Medicine, he completed an internship and residency at Harvard Medical School, Brigham & Women's Hospital. Before moving to Stanford, he was on the faculty at the UCLA School of Medicine for more than two decades.

Professor Berek has received many honors and accolades. Dr. Berek is the 2019 Lifetime Achievement Honoree of the American Cancer Society for his many accomplishments in women's cancer treatment and research. In 2022, he received a Lifetime Achievement Award from the International Society of Gynecologic Cancer for his contributions to the field of gynecologic oncology.

In addition to his medical career, Professor Berek is an active documentary filmmaker—creating and directing films on a variety of medical topics that are highlighted by patient stories. He is the Director and Producer of MedArts Films https://vimeo.com/medarts/videos. He directed a series of films for the Stanford Office of Medical Development, and many short films for the Stanford Center for Health Education that are found on YouTube at the Stanford Medicine Health Shelf. https://www.youtube.com/@Stanford_CHE/playlists

In collaboration with the Under One Umbrella Committee and Stanford Medical Center Development, Professor Berek has led a highly successful fundraising program for the Stanford Women's Cancer Center. Since 2009, these Under One Umbrella philanthropy efforts have generated substantial support for innovative research programs in women's cancer via concerts headlined by celebrities, including Nicole Kidman, Keith Urban, Trisha Yearwood, Garth Brooks, Tom Hanks, Rita Wilson, Carrie Underwood, Sheryl Crow, Vince Gill, Amy Grant, Darlene Love, and Harry Connick Jr. https://www.facebook.com/StanfordWomensCancerCenter/
