Bio

Erfan Mojaddam is the Manager of Academic Tech and Innovation with Stanford Medicine's Educational Technology team. He works closely with faculty and staff to research, initiate, implement, and catalyze the adoption of technology solutions that support teaching, learning, and research activities across the education programs at Stanford School of Medicine and Stanford Health Care. He also serves as the tech lead for the Digital MEdIC initiative, designing solutions that make Digital MEdIC's content accessible globally in the most remote locations.

CURRENT ROLE AT STANFORD

Erfan Mojaddam is the Manager of Academic Technology and Innovation (ATI). His team's focus is to work closely with faculty and staff to research, initiate, implement, and catalyze the adoption of technology solutions that support teaching, learning, and research activities across the education programs at Stanford Medicine.
