Bio

CLINICAL FOCUS
- Pediatric Cardiac Surgery
- Thoracic Surgery (Cardiothoracic Vascular Surgery)

ACADEMIC APPOINTMENTS
- Assistant Professor - Med Center Line, Cardiothoracic Surgery
- Member, Maternal & Child Health Research Institute (MCHRI)

PROFESSIONAL EDUCATION
- Fellowship: Stanford University Dept of Cardiothoracic Surgery (2018) CA
- Residency: Stanford University Dept of Cardiothoracic Surgery (2016) CA
- Medical Education: Columbia University College of Physicians and Surgeons (2010) NY
- BS, Stanford University, Chemical Engineering (2003)

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS
Our lab aims to understand the biomechanics that govern a wide spectrum of congenital heart defects, and how those biomechanics change with contemporary operative repair strategies. We simulate operations virtually via CFD, and in ex vivo and in vivo animal models, and analyze how the changes we make alter fluid flow, pressure, and stresses throughout the system. We hope that these experiments can impact and optimize existing techniques that translate quickly to the operating room.
