Bio

BIO

Dr. Catherine Curtin is a plastic/hand surgeon. Her clinical focus is peripheral nerve surgery and upper limb reconstruction. She attended Wellesley college and Yale University for medical school. She did her residency at the University of Michigan and her hand fellowship at Stanford University. She completed the Robert Wood Johnson Clinical Scholars Fellowship. Dr. Curtin has specialized in hand surgery and peripheral nerve surgery. She has a particular interest in improving the upper limb function for people with spinal cord injury. She is also interested in nerve pain and the role of surgery to help this pain. Her research focuses on both these areas: upper limb function for spinal cord injury and treatment of neuropathic pain.

Research & Scholarship

CURRENT RESEARCH AND SCHOLARLY INTERESTS

Maintaining and optimizing upper limb function in people with spinal cord injury and other nerve disorders.

We are looking at different treatment modalities from tendon transfers to nerve transfers. We are assessing issues with access to care and optimizing surgical outcomes

Improving pain and general well being after severe hand injuries.

Improving treatment and recognition of pain.

We are using big data to assess what are the factors associated with reduced pain. We are interested in developing guidelines for surgeons on the best strategies to reduce post operative pain.
