BIO

Jason Rathje is a Ph.D. student in the Department of Management Science & Engineering at Stanford University.

Research Area: Innovation, Organizations and National Security

Research Abstract:

Jason is currently PhD student in the Stanford Technology Ventures Program (STVP) with a focus on strategy and policy. His research interests lie at the intersection of corporate strategy, innovation and national security. Specifically, he studies the evolution of the knowledge economy and how private vs. public R&D expenditure shifts have shaped technological impacts. This includes research in innovation ecosystems, big-data network analyses, and case-based research on technology entrepreneurship. He has always looked forward to meeting and interacting with individuals interested in the intersection of national security and innovation, so please do not hesitate to reach out to Jason!
